

As a licensed Amateur radio operator, I do not support this petition, because it does not remove the Morse Code requirement for an Amateur radio operator.

We need more operators. When kids have a choice between using the Internet or being required to learn Morse code to use a radio, the choice is easy for them. Many excellent operators are being turned away because of the Morse Code requirement.

I consider Morse Code an operating mode, and we do not test for any other mode. So I see no reason to retain the Morse Code test requirement for Amateur radio operators.
